

June Market Wrap

As the month of June now comes towards the close it has been very much a roller coaster period to market wool. Coming off the highs of May and as displayed below all indicators are showing red numbers but the positive is prices still remain very sound compared with the end of April. Forecasted quantities leading up to the end of the financial year most certainly have had a significant role during the past couple of weeks in particular where exporters were comfortable with 35,000 bale sales but with cash flow issues and the extra volumes on the market prices were adjusted accordingly. Most activity has been driven by Chinese demand with some excellent support from Europe and India particularly in the finer end of the market. Wool sales still continue for the next 2 weeks prior to a 3 week recess before recommencing week beginning 3rd August.

Despite the falls over the past couple of weeks the AWEX-EMI still managed a 247 cent improvement for the season. At 24.3% it was the sixth best result in 35 years of tracking the EMI (both the AWEX and Aust. Wool Corp series).

The WISS website has had a revamp and although still being improved on the run. A new addition in particular is the provision to download shearing stationery via the document drop screen. The sign in area is for personal usage and available for clients to access test results as soon as they come to hand. For further information please don't hesitate to contact the office.

Keep up to date on the WISS iPhone app. Download free now from your app store. This app contains messages, sale dates, daily wool market movements and much more. Any client wishing to advertise sheep for sale etc. on the app please feel free to contact Robert Ellis 0417334659 for more information
