

August Market Wrap

Since the last report at the end of June the wool market has seen decline in prices for the 1st two sales in July enjoyed a recess and reopened in August with two weeks of strong activity for all wool's on offer, strong electronic sales and some reasonable forward prices available should the attraction be suitable. Just when expectations were looking positive the market lost all gains and for some types a little more as the month came to a close. It's believed that shipping requirements and a lack of volume were the key drivers for the early spike. As indicated below most Indicators are now below the end of June levels with the 18-23 micron range only dipping below at the close of this week. We mentioned in the weekly report, at the time of this wrap being released, good demand and interest has eventuated from exporters that should result in a rebound in prices next week.

AWTA data at the end of July reported that 10% less wool was tested for the month and a similar number may be reported over the coming week for August.

The positive for the month is the continued competition and demand for Crossbred's and Carding's which continue to provide some excellent returns for those types of wool. Prem shorn fleece wool prices also are attracting genuine trade demand to complement the Woollen market demand.
